Amendments to the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

 (Currently Amended) A method for specifying telephone services for a particular caller, comprising:

detecting a call initiation condition from an origin device at a trusted telephone network;

brokering a connection between said origin device and an external server enabled to perform a caller identity authentication service, wherein brokering a connection further comprises:

transmitting a request for said caller identity authentication service via a signal gateway to a network for accessing said external server;

transferring a prompt for a voice utterance, received from said external server via a media gateway that supports Session Initiation Protocol ("SIP"), to said origin device:

transferring a voice utterance by said caller through said media gateway to said network for accessing said external server; and

receiving said authenticated caller identity via said signal gateway at said trusted telephone network;

responsive to receiving, from said external server, an authenticated caller identity of a caller utilizing said origin device, specifying services available to said caller according to said authenticated caller identity; and

responsive to said authenticated caller identity indicating a lack of identity, automatically initiating recording of said call.

- (Original) The method for specifying telephone services according to claim 1, wherein said server is accessible via a network outside said trusted telephone network.
- (Original) The method for specifying telephone services according to claim 1, further comprising:

retrieving a caller profile for said authenticated caller identity; and

specifying a selection of services from among a plurality of services that are offered for said call according to said caller profile.

- (Original) The method for specifying telephone services according to claim 1, wherein said authenticated caller identity is authenticated by a voice utterance of said caller.
- 5. (Canceled)
- 6. (Original) The method for specifying telephone services according to claim 1, wherein brokering a connection further comprises:

brokering a secure connection between said trusted telephone network and said external server.

Claims 7-12. (Canceled)

13. (Currently Amended) A method for informing a callee of a caller identity, comprising:

detecting a call initiation condition from an origin device at a trusted telephone network;

brokering a connection between said origin device and an external server enabled to perform a caller identity authentication service, wherein brokering a connection further comprises:

transmitting a request for said caller identity authentication service via a signal gateway to a network for accessing said external server;

transferring a prompt for a voice utterance, received from said external server via a media gateway that supports Session Initiation Protocol ('SIP'), to said origin device;

transferring a voice utterance by said caller through said media gateway to said network for accessing said external server; and

receiving said authenticated caller identity via said signal gateway at said trusted telephone network;

responsive to receiving, from said external server, an authenticated caller identity of a caller utilizing said origin device, transferring said authenticated caller

identity to a destination device, such that a callee receiving said call at said destination device is provided with an identity of a party originating said call; and

responsive to said authenticated caller identity indicating a lack of identity, automatically initiating recording of said call.

- 14. (Original) The method for informing a callee of a caller identity according to claim 13, further comprising:
 - filtering content of said authenticated caller identity before transfer to said destination device.
- 15. (Original) The method for informing a callee of a caller identity according to claim 14, further comprising:
 - filtering content of said authenticated caller identity according to filtering preferences associated with said authenticated caller identity.
- 16. (Original) The method for informing a callee of a caller identity according to claim 14, further comprising:
 - filtering content of said authenticated caller identity according to an identity of said callee.
- 17. (Original) The method for informing a callee of a caller identity according to claim 14, further comprising:
 - filtering said authenticated caller identity to block at least a portion of the content of said authenticated caller identity.

Claims 18-32. (Canceled)
